

## Thematic Souvenir Stand

## Casting toolset – a liner in the hobby products

## MountMaple token – Stories in Souvenirs

- Stocken introduces Mount Maple (web [www.mountmaple.com](http://www.mountmaple.com))- early stage souvenir producer a company in consumer discretionary sector with very rapid growth potential.
- Mount Maple has been experimenting with materials and coatings for molds and copper casts and developed unique techniques to produce authentic products yet with emphasis on costs and cost of production.
- As a result a company developed a set of products which could provide it with hefty revenues and more importantly very good margins.
- Mount Maple expansion plan is unique and is likely to secure high growth of production.
- Company also has a secondary less important revenue lines producing hobby toolsets for rare crafts as as casting and molding.
- Mount Maple operates in a sector where a lot depends on a personality of a creator and the company developed good relations with various designers and has creative personall among its leaders.
- Company is developing automation such as 3d printing and webtools to produce and market its products, but most of the products company plans to sell off-line using third party relationships for marketing.
- Mount maple is also involved in R&D to blend home products with energy production, but the R&D results are likely to take some time. However some of the products in this line of business will be tested soon.
- Other R&D projects of the company are to blend art and construction business.
