

Food Production and Vertical Agriculture

February – 2020

Ideas of vertical agriculture

Mixed with Hydroponic techniques

Could yield success

Vertical Agriculture Food Production

- For years deurbanized lifestyle was accompanied with agriculture, food production and food sales on farmers markets. Ideas for Vertical Agriculture business and Food production are centered around same ideas
- Vertical agriculture business focuses on developing rooftop green houses
- Recycling household CO2 emissions
- Optimising household food production and developing small scale food producing businesses
- Developing rural food retail outlets and networks
